SE2030 - LAB 02 - 2026-Y2-S1-KU-36

Scenario: RideLanka FleetHire System — Web-Based Car Rental System

Project Overview

RideLanka FleetHire System is a web-based car rental platform designed to simplify and improve fleet booking, payments, maintenance and customer support. It connects customers, operations staff, finance officers and management, covering vehicle search, reservations, payment processing, fleet and maintenance tracking, complaint handling and reporting. The system is intended to reduce manual coordination, avoid booking conflicts and give staff and management timely, accurate information.

This report uses the same RideLanka FleetHire project topic, requirements context, CRUD ownership and stakeholder personas identified at the requirements-gathering phase (Lab 01). The priorities, role allocation and sprint sequence below form the Agile planning baseline for SE2030 Lab 02.

1. Group Details

Group Members and Scrum Roles

Member	IT Number	Scrum Role	Core Function
S. M. H. C. B. D. Rambukpitiya	IT25103736	Product Owner	User & Customer Management
I. K. S. P. Jayawardana	IT25103732	Scrum Master	Vehicle Management
W. M. K. K. G. N. A. Weerasingha	IT25103737	Developer	Booking & Reservation Management
R. M. M. D. Bhagyamathi	IT25103733	Developer	Payment Management
R. M. R. D. Rajapaksha	IT25103734	Developer	Feedback & Support Management
K. A. K. Dananjaya	IT25103735	Developer	Fleet Management

Scrum Accountability

- **Product Owner:** Owns value ordering, clarifies acceptance criteria, and accepts finished work.
- **Scrum Master:** Facilitates Scrum events, makes blockers visible, and helps the team follow the agreed process.
- **Developers:** Build, test, integrate, and demonstrate selected sprint work as a cross-functional team.
- **Ownership rule:** Scrum accountability does not replace the core-function ownership established at the requirements-gathering phase. Each member listed above retains their function as owner, defining domain rules and verifying behaviour; the Product Owner accepts each completed backlog item.

2. Identified Client Personas

ID	Persona	Role	Main Responsibility / Need
P01	Nuwan Perera	General Manager	Oversees overall business operations and needs visibility and control over users, access, bookings, fleet activity and reports.
P02	Dilini Jayasinghe	Customer Service Supervisor	Handles the post-rental customer experience, complaints, service issues and satisfaction tracking.
P03	Kasun Fernando	Fleet Operations Manager	Keeps the fleet organised, available and correctly categorised across branches.

ID	Persona	Role	Main Responsibility / Need
P04	Shanika Wijeratne	Finance and Accounts Officer	Handles billing, collections, payment records, invoices and financial reporting.
P05	Ravindu Senanayake	Vehicle Maintenance Coordinator	Coordinates servicing, repairs and inspections to keep vehicles roadworthy and safe.
P06	Tharushi Madushani	Marketing and Reservations Executive	Manages the reservation pipeline and promotional campaigns that drive bookings.

3. User Stories

P01 • Nuwan Perera — General Manager

Oversees overall business operations and needs visibility and control over users, access, bookings, fleet activity and reports.

ID	User Story	Priority
US01	As a General Manager, I want to view an overall business dashboard so that I can monitor bookings, vehicles, payments and customer activity.	High
US02	As a General Manager, I want to manage staff roles and access permissions so that sensitive system functions are controlled.	High
US03	As a General Manager, I want to generate management reports so that I can make informed business decisions.	Medium
US04	As a General Manager, I want to view important system activity and changes so that I can monitor accountability.	Medium

P02 • Dilini Jayasinghe — Customer Service Supervisor

Handles the post-rental customer experience, complaints, service issues and satisfaction tracking.

ID	User Story	Priority
US05	As a Customer Service Supervisor, I want to view customer complaints so that I can respond to service issues.	High
US06	As a Customer Service Supervisor, I want to update complaint status so that customers can be given clear progress updates.	High
US07	As a Customer Service Supervisor, I want to view customer feedback and ratings so that I can identify recurring problems.	Medium
US08	As a Customer Service Supervisor, I want to record complaint resolutions so that completed cases have a clear history.	Medium

P03 • Kasun Fernando — Fleet Operations Manager

Keeps the fleet organised, available and correctly categorised across branches.

ID	User Story	Priority
US09	As a Fleet Operations Manager, I want to view vehicle availability by branch so that I can allocate vehicles effectively.	High
US10	As a Fleet Operations Manager, I want to update vehicle status so that booking staff see accurate availability.	High
US11	As a Fleet Operations Manager, I want to manage vehicle categories and branch assignments so that the fleet remains organised.	Medium

ID	User Story	Priority
US12	As a Fleet Operations Manager, I want to view fleet utilisation information so that I can identify underused or heavily used vehicles.	Medium

P04 • Shanika Wijeratne — Finance and Accounts Officer

Handles billing, collections, payment records, invoices and financial reporting.

ID	User Story	Priority
US13	As a Finance and Accounts Officer, I want to view rental payment records so that I can reconcile customer transactions.	High
US14	As a Finance and Accounts Officer, I want to issue invoices and receipts so that customers receive correct payment documents.	High
US15	As a Finance and Accounts Officer, I want to process refunds and additional charges so that rental adjustments are recorded correctly.	Medium
US16	As a Finance and Accounts Officer, I want to generate financial reports so that I can review revenue and collections.	Medium

P05 • Ravindu Senanayake — Vehicle Maintenance Coordinator

Coordinates servicing, repairs and inspections to keep vehicles roadworthy and safe.

ID	User Story	Priority
US17	As a Vehicle Maintenance Coordinator, I want to schedule vehicle servicing so that maintenance is completed on time.	High
US18	As a Vehicle Maintenance Coordinator, I want to record repairs and service history so that each vehicle has an up-to-date maintenance record.	High
US19	As a Vehicle Maintenance Coordinator, I want to record inspection results so that vehicles can be checked before returning to service.	High
US20	As a Vehicle Maintenance Coordinator, I want to mark a vehicle unavailable during maintenance so that it cannot be booked while unsafe or under repair.	High

P06 • Tharushi Madushani — Marketing and Reservations Executive

Manages the reservation pipeline and promotional campaigns that drive bookings.

ID	User Story	Priority
US21	As a Marketing and Reservations Executive, I want to view the reservation pipeline so that I can monitor upcoming and pending bookings.	High
US22	As a Marketing and Reservations Executive, I want to create and manage promotional offers so that campaigns can increase bookings.	Medium
US23	As a Marketing and Reservations Executive, I want to check vehicle availability while making a reservation so that I do not create conflicting bookings.	High
US24	As a Marketing and Reservations Executive, I want to send booking confirmations and reminders so that customers receive timely information.	Medium

4. Product Backlog

The product backlog consolidates all 24 user stories and assigns priorities. High-priority stories form the foundation of the first releases, while medium-priority stories are scheduled after the core rental flow is established.

ID	Persona	User Story	Priority	Primary Owner
US01	P01	As a General Manager, I want to view an overall business dashboard so that I can monitor bookings, vehicles, payments and customer activity.	High	S. M. H. C. B. D. Rambukpitiya
US02	P01	As a General Manager, I want to manage staff roles and access permissions so that sensitive system functions are controlled.	High	S. M. H. C. B. D. Rambukpitiya
US03	P01	As a General Manager, I want to generate management reports so that I can make informed business decisions.	Medium	S. M. H. C. B. D. Rambukpitiya
US04	P01	As a General Manager, I want to view important system activity and changes so that I can monitor accountability.	Medium	S. M. H. C. B. D. Rambukpitiya
US05	P02	As a Customer Service Supervisor, I want to view customer complaints so that I can respond to service issues.	High	R. M. R. D. Rajapaksha
US06	P02	As a Customer Service Supervisor, I want to update complaint status so that customers can be given clear progress updates.	High	R. M. R. D. Rajapaksha
US07	P02	As a Customer Service Supervisor, I want to view customer feedback and ratings so that I can identify recurring problems.	Medium	R. M. R. D. Rajapaksha
US08	P02	As a Customer Service Supervisor, I want to record complaint resolutions so that completed cases have a clear history.	Medium	R. M. R. D. Rajapaksha
US09	P03	As a Fleet Operations Manager, I want to view vehicle availability by branch so that I can allocate vehicles effectively.	High	I. K. S. P. Jayawardana
US10	P03	As a Fleet Operations Manager, I want to update vehicle status so that booking staff see accurate availability.	High	I. K. S. P. Jayawardana
US11	P03	As a Fleet Operations Manager, I want to manage vehicle categories and branch assignments so that the fleet remains organised.	Medium	I. K. S. P. Jayawardana
US12	P03	As a Fleet Operations Manager, I want to view fleet utilisation information so that I can identify underused or heavily used vehicles.	Medium	I. K. S. P. Jayawardana
US13	P04	As a Finance and Accounts Officer, I want to view rental payment records so that I can reconcile customer transactions.	High	R. M. M. D. Bhagyamathi
US14	P04	As a Finance and Accounts Officer, I want to issue invoices and receipts so that customers receive correct payment documents.	High	R. M. M. D. Bhagyamathi

ID	Persona	User Story	Priority	Primary Owner
US15	P04	As a Finance and Accounts Officer, I want to process refunds and additional charges so that rental adjustments are recorded correctly.	Medium	R. M. M. D. Bhagyamathi
US16	P04	As a Finance and Accounts Officer, I want to generate financial reports so that I can review revenue and collections.	Medium	R. M. M. D. Bhagyamathi
US17	P05	As a Vehicle Maintenance Coordinator, I want to schedule vehicle servicing so that maintenance is completed on time.	High	K. A. K. Dananjaya
US18	P05	As a Vehicle Maintenance Coordinator, I want to record repairs and service history so that each vehicle has an up-to-date maintenance record.	High	K. A. K. Dananjaya
US19	P05	As a Vehicle Maintenance Coordinator, I want to record inspection results so that vehicles can be checked before returning to service.	High	K. A. K. Dananjaya
US20	P05	As a Vehicle Maintenance Coordinator, I want to mark a vehicle unavailable during maintenance so that it cannot be booked while unsafe or under repair.	High	K. A. K. Dananjaya
US21	P06	As a Marketing and Reservations Executive, I want to view the reservation pipeline so that I can monitor upcoming and pending bookings.	High	W. M. K. K. G. N. A. Weerasingha
US22	P06	As a Marketing and Reservations Executive, I want to create and manage promotional offers so that campaigns can increase bookings.	Medium	W. M. K. K. G. N. A. Weerasingha
US23	P06	As a Marketing and Reservations Executive, I want to check vehicle availability while making a reservation so that I do not create conflicting bookings.	High	W. M. K. K. G. N. A. Weerasingha
US24	P06	As a Marketing and Reservations Executive, I want to send booking confirmations and reminders so that customers receive timely information.	Medium	W. M. K. K. G. N. A. Weerasingha

5. Sprint Plan

Four sprints are planned according to the lab instructions. The sequence starts with access, visibility and availability, then builds the booking/payment/support flow, followed by fleet and maintenance functions, and finally reporting, control and campaign features.

Sprint 1 — Foundation & Customer Access

Sprint Story	User Story	Priority	Owner
US01	As a General Manager, I want to view an overall business dashboard so that I can monitor bookings, vehicles, payments and customer activity.	High	S. M. H. C. B. D. Rambukpitiya
US02	As a General Manager, I want to manage staff roles and access permissions so that sensitive system functions are controlled.	High	S. M. H. C. B. D. Rambukpitiya
US09	As a Fleet Operations Manager, I want to view vehicle availability by branch so that I can allocate vehicles effectively.	High	I. K. S. P. Jayawardana

Sprint Story	User Story	Priority	Owner
US10	As a Fleet Operations Manager, I want to update vehicle status so that booking staff see accurate availability.	High	I. K. S. P. Jayawardana
US13	As a Finance and Accounts Officer, I want to view rental payment records so that I can reconcile customer transactions.	High	R. M. M. D. Bhagyamathi
US21	As a Marketing and Reservations Executive, I want to view the reservation pipeline so that I can monitor upcoming and pending bookings.	High	W. M. K. K. G. N. A. Weerasingha

Sprint 2 — Booking, Payment & Support

Sprint Story	User Story	Priority	Owner
US03	As a General Manager, I want to generate management reports so that I can make informed business decisions.	Medium	S. M. H. C. B. D. Rambukpitiya
US05	As a Customer Service Supervisor, I want to view customer complaints so that I can respond to service issues.	High	R. M. R. D. Rajapaksha
US06	As a Customer Service Supervisor, I want to update complaint status so that customers can be given clear progress updates.	High	R. M. R. D. Rajapaksha
US14	As a Finance and Accounts Officer, I want to issue invoices and receipts so that customers receive correct payment documents.	High	R. M. M. D. Bhagyamathi
US23	As a Marketing and Reservations Executive, I want to check vehicle availability while making a reservation so that I do not create conflicting bookings.	High	W. M. K. K. G. N. A. Weerasingha
US24	As a Marketing and Reservations Executive, I want to send booking confirmations and reminders so that customers receive timely information.	Medium	W. M. K. K. G. N. A. Weerasingha

Sprint 3 — Fleet, Maintenance & Customer Experience

Sprint Story	User Story	Priority	Owner
US07	As a Customer Service Supervisor, I want to view customer feedback and ratings so that I can identify recurring problems.	Medium	R. M. R. D. Rajapaksha
US08	As a Customer Service Supervisor, I want to record complaint resolutions so that completed cases have a clear history.	Medium	R. M. R. D. Rajapaksha
US11	As a Fleet Operations Manager, I want to manage vehicle categories and branch assignments so that the fleet remains organised.	Medium	I. K. S. P. Jayawardana
US15	As a Finance and Accounts Officer, I want to process refunds and additional charges so that rental adjustments are recorded correctly.	Medium	R. M. M. D. Bhagyamathi
US17	As a Vehicle Maintenance Coordinator, I want to schedule vehicle servicing so that maintenance is completed on time.	High	K. A. K. Dananjaya
US18	As a Vehicle Maintenance Coordinator, I want to record repairs and service history so that each vehicle has an up-to-date maintenance record.	High	K. A. K. Dananjaya

Sprint 4 — Control, Reporting & Completion

Sprint Story	User Story	Priority	Owner
US04	As a General Manager, I want to view important system activity and changes so that I can monitor accountability.	Medium	S. M. H. C. B. D. Rambukpitiya
US12	As a Fleet Operations Manager, I want to view fleet utilisation information so that I can identify underused or heavily used vehicles.	Medium	I. K. S. P. Jayawardana
US16	As a Finance and Accounts Officer, I want to generate financial reports so that I can review revenue and collections.	Medium	R. M. M. D. Bhagyamathi
US19	As a Vehicle Maintenance Coordinator, I want to record inspection results so that vehicles can be checked before returning to service.	High	K. A. K. Dananjaya
US20	As a Vehicle Maintenance Coordinator, I want to mark a vehicle unavailable during maintenance so that it cannot be booked while unsafe or under repair.	High	K. A. K. Dananjaya
US22	As a Marketing and Reservations Executive, I want to create and manage promotional offers so that campaigns can increase bookings.	Medium	W. M. K. K. G. N. A. Weerasingha

6. Task Assignments & Ownership

Each selected user story is broken into five practical tasks: UI, API/backend, database, business rules/validation, and testing. Primary ownership follows the group's established core-function ownership, while the Product Owner and Scrum Master coordinate scope and delivery.

Sprint 1 — Foundation & Customer Access

Task ID	Area	Task	Owner
US01.1	UI	Design the user interface for the story.	S. M. H. C. B. D. Rambukpitiya
US01.2	API	Implement the backend/API operation required by the story.	S. M. H. C. B. D. Rambukpitiya
US01.3	DB	Create or update the database structure and validation.	S. M. H. C. B. D. Rambukpitiya
US01.4	Rules	Implement business rules, permissions and error handling.	S. M. H. C. B. D. Rambukpitiya
US01.5	Test	Test the complete user story and fix defects.	S. M. H. C. B. D. Rambukpitiya
US02.1	UI	Design the user interface for the story.	S. M. H. C. B. D. Rambukpitiya
US02.2	API	Implement the backend/API operation required by the story.	S. M. H. C. B. D. Rambukpitiya
US02.3	DB	Create or update the database structure and validation.	S. M. H. C. B. D. Rambukpitiya
US02.4	Rules	Implement business rules, permissions and error handling.	S. M. H. C. B. D. Rambukpitiya

Task ID	Area	Task	Owner
US02.5	Test	Test the complete user story and fix defects.	S. M. H. C. B. D. Rambukpitiya
US09.1	UI	Design the user interface for the story.	I. K. S. P. Jayawardana
US09.2	API	Implement the backend/API operation required by the story.	I. K. S. P. Jayawardana
US09.3	DB	Create or update the database structure and validation.	I. K. S. P. Jayawardana
US09.4	Rules	Implement business rules, permissions and error handling.	I. K. S. P. Jayawardana
US09.5	Test	Test the complete user story and fix defects.	I. K. S. P. Jayawardana
US10.1	UI	Design the user interface for the story.	I. K. S. P. Jayawardana
US10.2	API	Implement the backend/API operation required by the story.	I. K. S. P. Jayawardana
US10.3	DB	Create or update the database structure and validation.	I. K. S. P. Jayawardana
US10.4	Rules	Implement business rules, permissions and error handling.	I. K. S. P. Jayawardana
US10.5	Test	Test the complete user story and fix defects.	I. K. S. P. Jayawardana
US13.1	UI	Design the user interface for the story.	R. M. M. D. Bhagyamathi
US13.2	API	Implement the backend/API operation required by the story.	R. M. M. D. Bhagyamathi
US13.3	DB	Create or update the database structure and validation.	R. M. M. D. Bhagyamathi
US13.4	Rules	Implement business rules, permissions and error handling.	R. M. M. D. Bhagyamathi
US13.5	Test	Test the complete user story and fix defects.	R. M. M. D. Bhagyamathi
US21.1	UI	Design the user interface for the story.	W. M. K. K. G. N. A. Weerasingha
US21.2	API	Implement the backend/API operation required by the story.	W. M. K. K. G. N. A. Weerasingha
US21.3	DB	Create or update the database structure and validation.	W. M. K. K. G. N. A. Weerasingha
US21.4	Rules	Implement business rules, permissions and error handling.	W. M. K. K. G. N. A. Weerasingha
US21.5	Test	Test the complete user story and fix defects.	W. M. K. K. G. N. A. Weerasingha

Sprint 2 — Booking, Payment & Support

Task ID	Area	Task	Owner
US03.1	UI	Design the user interface for the story.	S. M. H. C. B. D. Rambukpitiya
US03.2	API	Implement the backend/API operation required by the story.	S. M. H. C. B. D. Rambukpitiya
US03.3	DB	Create or update the database structure and validation.	S. M. H. C. B. D. Rambukpitiya
US03.4	Rules	Implement business rules, permissions and error handling.	S. M. H. C. B. D. Rambukpitiya
US03.5	Test	Test the complete user story and fix defects.	S. M. H. C. B. D. Rambukpitiya
US05.1	UI	Design the user interface for the story.	R. M. R. D. Rajapaksha
US05.2	API	Implement the backend/API operation required by the story.	R. M. R. D. Rajapaksha
US05.3	DB	Create or update the database structure and validation.	R. M. R. D. Rajapaksha
US05.4	Rules	Implement business rules, permissions and error handling.	R. M. R. D. Rajapaksha
US05.5	Test	Test the complete user story and fix defects.	R. M. R. D. Rajapaksha
US06.1	UI	Design the user interface for the story.	R. M. R. D. Rajapaksha
US06.2	API	Implement the backend/API operation required by the story.	R. M. R. D. Rajapaksha
US06.3	DB	Create or update the database structure and validation.	R. M. R. D. Rajapaksha
US06.4	Rules	Implement business rules, permissions and error handling.	R. M. R. D. Rajapaksha
US06.5	Test	Test the complete user story and fix defects.	R. M. R. D. Rajapaksha
US14.1	UI	Design the user interface for the story.	R. M. M. D. Bhagyamathi
US14.2	API	Implement the backend/API operation required by the story.	R. M. M. D. Bhagyamathi
US14.3	DB	Create or update the database structure and validation.	R. M. M. D. Bhagyamathi
US14.4	Rules	Implement business rules, permissions and error handling.	R. M. M. D. Bhagyamathi
US14.5	Test	Test the complete user story and fix defects.	R. M. M. D. Bhagyamathi

Task ID	Area	Task	Owner
US23.1	UI	Design the user interface for the story.	W. M. K. K. G. N. A. Weerasingha
US23.2	API	Implement the backend/API operation required by the story.	W. M. K. K. G. N. A. Weerasingha
US23.3	DB	Create or update the database structure and validation.	W. M. K. K. G. N. A. Weerasingha
US23.4	Rules	Implement business rules, permissions and error handling.	W. M. K. K. G. N. A. Weerasingha
US23.5	Test	Test the complete user story and fix defects.	W. M. K. K. G. N. A. Weerasingha
US24.1	UI	Design the user interface for the story.	W. M. K. K. G. N. A. Weerasingha
US24.2	API	Implement the backend/API operation required by the story.	W. M. K. K. G. N. A. Weerasingha
US24.3	DB	Create or update the database structure and validation.	W. M. K. K. G. N. A. Weerasingha
US24.4	Rules	Implement business rules, permissions and error handling.	W. M. K. K. G. N. A. Weerasingha
US24.5	Test	Test the complete user story and fix defects.	W. M. K. K. G. N. A. Weerasingha

Sprint 3 — Fleet, Maintenance & Customer Experience

Task ID	Area	Task	Owner
US07.1	UI	Design the user interface for the story.	R. M. R. D. Rajapaksha
US07.2	API	Implement the backend/API operation required by the story.	R. M. R. D. Rajapaksha
US07.3	DB	Create or update the database structure and validation.	R. M. R. D. Rajapaksha
US07.4	Rules	Implement business rules, permissions and error handling.	R. M. R. D. Rajapaksha
US07.5	Test	Test the complete user story and fix defects.	R. M. R. D. Rajapaksha
US08.1	UI	Design the user interface for the story.	R. M. R. D. Rajapaksha
US08.2	API	Implement the backend/API operation required by the story.	R. M. R. D. Rajapaksha
US08.3	DB	Create or update the database structure and validation.	R. M. R. D. Rajapaksha
US08.4	Rules	Implement business rules, permissions and error handling.	R. M. R. D. Rajapaksha
US08.5	Test	Test the complete user story and fix defects.	R. M. R. D. Rajapaksha

Task ID	Area	Task	Owner
US11.1	UI	Design the user interface for the story.	I. K. S. P. Jayawardana
US11.2	API	Implement the backend/API operation required by the story.	I. K. S. P. Jayawardana
US11.3	DB	Create or update the database structure and validation.	I. K. S. P. Jayawardana
US11.4	Rules	Implement business rules, permissions and error handling.	I. K. S. P. Jayawardana
US11.5	Test	Test the complete user story and fix defects.	I. K. S. P. Jayawardana
US15.1	UI	Design the user interface for the story.	R. M. M. D. Bhagyamathi
US15.2	API	Implement the backend/API operation required by the story.	R. M. M. D. Bhagyamathi
US15.3	DB	Create or update the database structure and validation.	R. M. M. D. Bhagyamathi
US15.4	Rules	Implement business rules, permissions and error handling.	R. M. M. D. Bhagyamathi
US15.5	Test	Test the complete user story and fix defects.	R. M. M. D. Bhagyamathi
US17.1	UI	Design the user interface for the story.	K. A. K. Dananjaya
US17.2	API	Implement the backend/API operation required by the story.	K. A. K. Dananjaya
US17.3	DB	Create or update the database structure and validation.	K. A. K. Dananjaya
US17.4	Rules	Implement business rules, permissions and error handling.	K. A. K. Dananjaya
US17.5	Test	Test the complete user story and fix defects.	K. A. K. Dananjaya
US18.1	UI	Design the user interface for the story.	K. A. K. Dananjaya
US18.2	API	Implement the backend/API operation required by the story.	K. A. K. Dananjaya
US18.3	DB	Create or update the database structure and validation.	K. A. K. Dananjaya
US18.4	Rules	Implement business rules, permissions and error handling.	K. A. K. Dananjaya
US18.5	Test	Test the complete user story and fix defects.	K. A. K. Dananjaya

Sprint 4 — Control, Reporting & Completion

Task ID	Area	Task	Owner
US04.1	UI	Design the user interface for the story.	S. M. H. C. B. D. Rambukpitiya
US04.2	API	Implement the backend/API operation required by the story.	S. M. H. C. B. D. Rambukpitiya
US04.3	DB	Create or update the database structure and validation.	S. M. H. C. B. D. Rambukpitiya
US04.4	Rules	Implement business rules, permissions and error handling.	S. M. H. C. B. D. Rambukpitiya
US04.5	Test	Test the complete user story and fix defects.	S. M. H. C. B. D. Rambukpitiya
US12.1	UI	Design the user interface for the story.	I. K. S. P. Jayawardana
US12.2	API	Implement the backend/API operation required by the story.	I. K. S. P. Jayawardana
US12.3	DB	Create or update the database structure and validation.	I. K. S. P. Jayawardana
US12.4	Rules	Implement business rules, permissions and error handling.	I. K. S. P. Jayawardana
US12.5	Test	Test the complete user story and fix defects.	I. K. S. P. Jayawardana
US16.1	UI	Design the user interface for the story.	R. M. M. D. Bhagyamathi
US16.2	API	Implement the backend/API operation required by the story.	R. M. M. D. Bhagyamathi
US16.3	DB	Create or update the database structure and validation.	R. M. M. D. Bhagyamathi
US16.4	Rules	Implement business rules, permissions and error handling.	R. M. M. D. Bhagyamathi
US16.5	Test	Test the complete user story and fix defects.	R. M. M. D. Bhagyamathi
US19.1	UI	Design the user interface for the story.	K. A. K. Dananjaya
US19.2	API	Implement the backend/API operation required by the story.	K. A. K. Dananjaya
US19.3	DB	Create or update the database structure and validation.	K. A. K. Dananjaya
US19.4	Rules	Implement business rules, permissions and error handling.	K. A. K. Dananjaya
US19.5	Test	Test the complete user story and fix defects.	K. A. K. Dananjaya
US20.1	UI	Design the user interface for the story.	K. A. K. Dananjaya

Task ID	Area	Task	Owner
US20.2	API	Implement the backend/API operation required by the story.	K. A. K. Dananjaya
US20.3	DB	Create or update the database structure and validation.	K. A. K. Dananjaya
US20.4	Rules	Implement business rules, permissions and error handling.	K. A. K. Dananjaya
US20.5	Test	Test the complete user story and fix defects.	K. A. K. Dananjaya
US22.1	UI	Design the user interface for the story.	W. M. K. K. G. N. A. Weerasingha
US22.2	API	Implement the backend/API operation required by the story.	W. M. K. K. G. N. A. Weerasingha
US22.3	DB	Create or update the database structure and validation.	W. M. K. K. G. N. A. Weerasingha
US22.4	Rules	Implement business rules, permissions and error handling.	W. M. K. K. G. N. A. Weerasingha
US22.5	Test	Test the complete user story and fix defects.	W. M. K. K. G. N. A. Weerasingha

7. Scrum Roles

Member	IT Number	Scrum Role	Responsibility
S. M. H. C. B. D. Rambukpitiya	IT25103736	Product Owner	Prioritises the backlog, clarifies stakeholder needs and accepts completed stories.
I. K. S. P. Jayawardana	IT25103732	Scrum Master	Facilitates Scrum activities, removes blockers and keeps the team aligned with the sprint plan.
W. M. K. K. G. N. A. Weerasingha	IT25103737	Developer	Designs, implements, integrates and tests the assigned core functions and user stories.
R. M. M. D. Bhagyamathi	IT25103733	Developer	Designs, implements, integrates and tests the assigned core functions and user stories.
R. M. R. D. Rajapaksha	IT25103734	Developer	Designs, implements, integrates and tests the assigned core functions and user stories.
K. A. K. Dananjaya	IT25103735	Developer	Designs, implements, integrates and tests the assigned core functions and user stories.

8. Story Completion & Sprint Review Criteria

Criterion	Expected Result
Function works	The user story can be completed through the intended web interface.
Validation	Required fields, invalid values and important business rules are handled.
Data consistency	The correct customer, vehicle, booking, payment or support records are stored and retrieved.
Access control	Only permitted users can perform restricted actions.
Error handling	The user receives a clear message when an action cannot be completed.
Testing	The assigned story is tested before it is considered complete.

Sprint Review Focus

Sprint	Review Question
Sprint 1	Can authorised users access the system, and can staff see/update vehicle availability and basic payment/booking information?
Sprint 2	Can the system support the core reservation flow with payment, support cases and booking notifications?
Sprint 3	Can staff manage fleet categories and maintenance while preserving customer feedback and service history?
Sprint 4	Can management use reports and audit information, and can the system support the final promotional and operational controls?

9. Lab 02 Submission Checklist

Check	Requirement
✓	Group details: project topic and six group members included.
✓	Six RideLanka client personas identified.
✓	Minimum four user stories provided for each persona (24 total).
✓	Product backlog lists and prioritises the user stories.
✓	First, second, third and fourth sprint plans are defined.
✓	Tasks are broken down and assigned to members.
✓	Scrum roles are assigned: Product Owner, Scrum Master and four Developers.
✓	Report is structured and aligned with the SE2030 Lab 02 requirements.
